

Fanno Creek Habitat Conservation Project

A Better Creek for Fish, Wildlife, Water, and People

The Tualatin Soil and Water Conservation District (Tualatin SWCD) helps Washington County residents care for our land, water, and community.

The Fanno Creek Habitat Conservation Project is dedicated to enhancing the ecological health and resilience of the Fanno Creek by removing invasive plants and restoring the area with native plants.

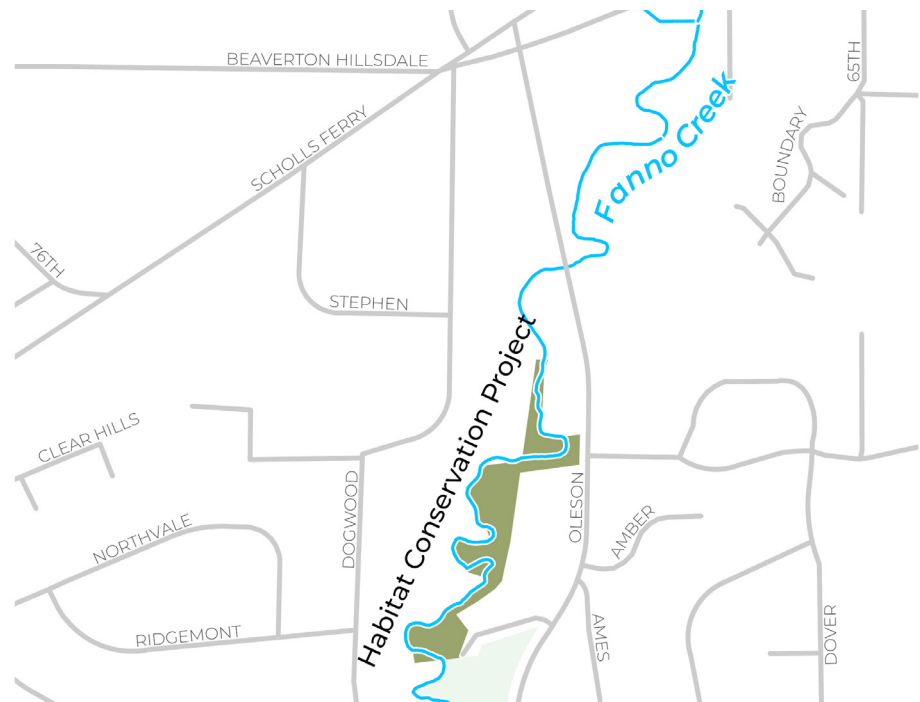

Your participation is crucial in making this project a success, and we believe that together, we can make a significant positive impact on the environment and the community.

Restoring Fanno Creek

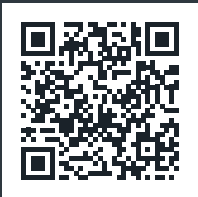

Over the next several years the Tualatin SWCD will be working with you and your neighbors to restore Fanno Creek. The goals of this project are to :

- **Attract Wildlife:** Native plants will draw birds, butterflies, and other wildlife, bringing new life to your landscape
- **Improve Water Quality:** Healthy habitats contribute to cleaner water, benefiting everyone downstream
- **Restore Natural Beauty:** Watch as your land transform into a picturesque haven for both you and the local fauna

How does it work?

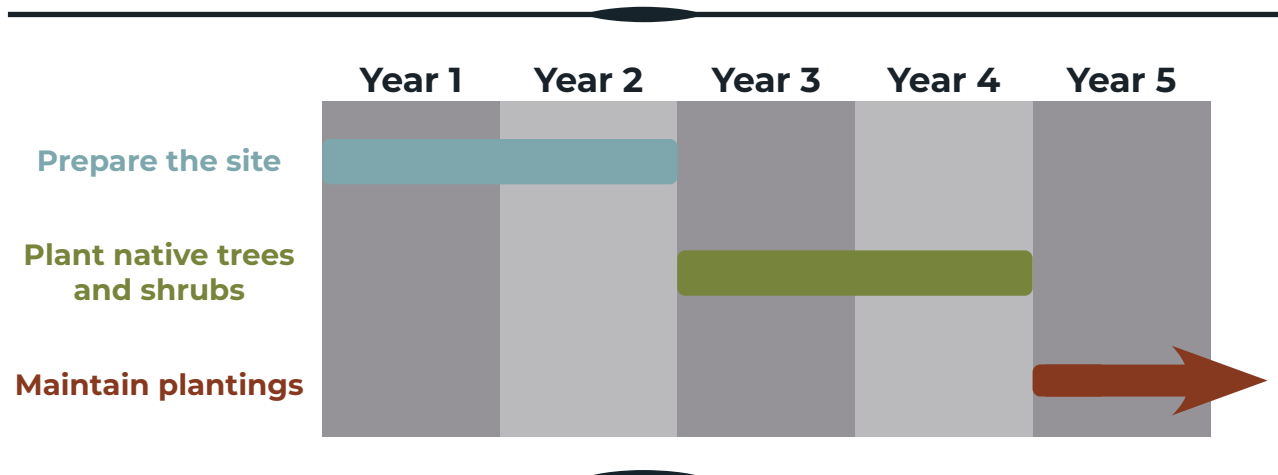

By enrolling in this project, you've become an essential partner in the restoration process. Our team of expert contractors will complete a phased restoration of your landscape including:

- Removing invasive plants that are harming the natural habitat
- Planting native trees and shrubs
- Maintaining new plants during the first three to five years of the project

What is the project timeline?

Conservation projects occur over approximately five years. After the initial project establishment, periodic maintenance will be required. Initially, the site may appear bleak, but it will soon green up with new growth and diversity as native plants create quality habitat for wildlife.

Want to get involved?

We invite you to get involved in the transformation of your neighborhood! Here's how:

- **Help spread the word.** Help us expand this project by encouraging your neighbors to learn more about it.
- **Enroll your property in the Backyard Habitat Certification Program.** Those who enroll receive discounts from local nurseries. Visit BackyardHabitats.org to learn more.
- **Attend an upcoming conservation workshop this fall.** To sign up for a future workshop, visit our website: bit.ly/TualatinSWCDEvents.
